Preface

Here come the golden words

place(s),
month year

First name Surname
First name Surname

Known issues with typesetting this document

0.0.1 Author index generation

The documentclass does not support author indices directly. The author index is formatted with a command called listofauthors. This command is defined in the Preamble. I found this command online. I tried to add the multicols environment. The rightmost column overlapped with the header line on the first page of the index. Hide this line might solve the problem.

0.0.2 Underscores and the xurl package

This package cannot handle underscores in URLs. I obtained a memory error. The solution was to comment out the xrul package. The solution was provided by Dr. LainTze Lim of Overleaf.

0.0.3 Stop overusing labels

Add labels only when you need them, else they will be unreferenced and trigger a lot of warnings. In addition, do not use labels in templates that write tex files unless you write only unique labels. Otherwise, you will get a warning about multiple identical labels. It is the situation with the month.tex files. All twelve had an intro label.

Generation of daily record tex files for a year.

The month.tex files for 2021 are found in the `~/db/750words2015Current` subdirectory of the db subdirectory. They are in twelve separate folders labeled by month.

The daily files were generated by running a Python script `makeDailyPagesVarB.py` in each folder. This was done with a batch script.

Listing 0.0.1: Contents of genPages.sh.

```
#!/bin/bash
cd January
../makeDaily750PagesVerB.py 2021 'January' 1 31
```

```

cd ../February
../makeDaily750PagesVerB.py 2021 'February' 1 28
cd ../March
../makeDaily750PagesVerB.py 2021 'March' 1 31
cd ../April
../makeDaily750PagesVerB.py 2021 'April' 1 30
cd ../May
../makeDaily750PagesVerB.py 2021 'May' 1 31
cd ../June
../makeDaily750PagesVerB.py 2021 'June' 1 30
cd ../July
../makeDaily750PagesVerB.py 2021 'July' 1 31
cd ../July
../makeDaily750PagesVerB.py 2021 'July' 1 31
cd ../August
../makeDaily750PagesVerB.py 2021 'August' 1 31
cd ../September
../makeDaily750PagesVerB.py 2021 'September' 1 30
cd ../October
../makeDaily750PagesVerB.py 2021 'October' 1 31
cd ../November
../makeDaily750PagesVerB.py 2021 'November' 1 30
cd ../December
../makeDaily750PagesVerB.py 2021 'December' 1 31

```

RAM may limit 750words to one document per year.

Correcting monthly.tex and making daily.tex files

I used colons as delimiters in the following sed commands.

Listing 0.0.2: Correcting existing files.

```

find . -name "February2021.tex" -type f | xargs sed -i -e 's:2020:2021:g'
find . -name "February2021.tex" -type f | xargs sed -i -e 's:../February:../Content/February:g'
find . -name "../Content/October/October2021.tex" -type f | xargs sed -i -e
↪ 's:../October:../Content/October:g'
find . -name "../Content/November/November2021.tex" -type f | xargs sed -i -e
↪ 's:../November:../Content/November:g'
find . -name "../Content/December/December2021.tex" -type f | xargs sed -i -e
↪ 's:../December:../Content/December:g'

```

December 2024

Your text goes here. Separate text sections with the standard \LaTeX sectioning commands.

My major writing projects for December for submission are as follows:

1. Ufirst (U16) Nov. 30th
2. Usecond (22U9) Nov. 16th
3. 2D Nov. 30th
4. NIH grants for February deadline
5. AprimeSeek
6. MPTSsurvey
7. report for COBRE Dec. 12th or so
8. NIH grants for February deadline

12.1 December 1
12.2 December 2
12.3 December 3
12.4 December 4
12.5 December 5
12.6 December 6
12.7 December 7
12.8 December 8
12.9 December 9
12.10 December 10
12.11 December 11
12.12 December 12
12.13 December 13
12.14 December 14
12.15 December 15
12.16 December 16
12.17 December 17
12.18 December 18
12.19 December 19
12.20 December 20
12.21 December 21
12.22 December 22
12.23 December 23
12.24 December 24
12.25 December 25
12.26 December 26
12.27 December 27

Part II

Appendices

This is a test Mooers (2016).

Part III

Backmatter
